RE: Reclamation Recommendations, Holnam Inc.
Poverty Point Limestone Quarry, M/045/012
Tooele County, Utah

Dear Wayne:

The Division of State Lands and Forestry has reconsidered renewal of Holnam's mineral lease ML 36110 as indicated in the attached letter. Holnam will not be starting reclamation of the quarry at this time, but will keep the permit and quarry active.

I appreciate you and your staff's efforts in classifying the reclamation requirements for the specific problems encountered at this site. We will follow your recommendations when we do close the quarry.

I will be doing reclamation of the old drill site and access roads on the BLM claims adjoining the quarry site on Tuesday, October 30, 1990 and will utilize the seed mixture recommended in your letter of October 1, 1990.

Sincerely,

Roy L. Stienmier

Dear Roy:

RE: Utah State Limestone Lease ML 36110

As we discussed during your visit September 20, I have included amendments to Holnam's mineral lease for signature. The amendment allows the lease to be extended to September 1, 1998 through diligent operations and payment of the \$1.00 per acre annual rental and \$3.00 per acre minimum royalty; of course continual commercial production will extend the lease indefinitely. The lease amendment will take effect on the next anniversary date.

Please have both copies signed and notarized. Then return both copies to this office for final execution. Should you decide not to accept the amended terms of the lease, the lease will expire on the next anniversary date.

Sincerely,

JERRY W. MANSFIELD
MINERAL RESOURCES SPECIALIST
